

Care@Home™

Family

Enabling the family to proactively care for their loved ones

- Easily installed customized family care – decide what is important for you to monitor
- Flexible rules engine – set alerts according to your parents' habits
- Family and caregivers monitoring app – get a clear picture of resident's daily activities
- Professional monitoring – highly scalable solution for home-care providers

Care@Home™ Family brings customized care for your loved ones with an advanced interface that allows family members to keep abreast of elderly relatives who require partial or full daily monitoring. This flexible solution enables family members to adapt monitoring parameters to the needs of the resident and can be used as a self-monitored or professionally monitored service.

Self-Monitoring Home Care for Families

Confidence and independence

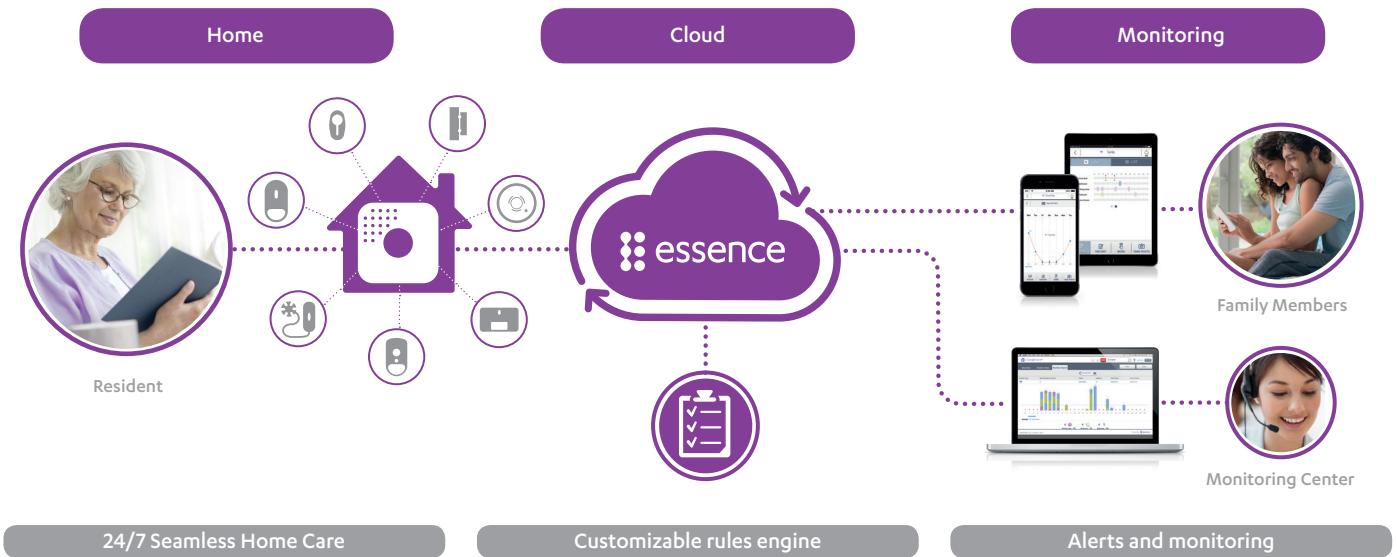

"My Care@Home Family system allows me to move freely around my house with the knowledge that I am safe. I am happy to know that I have some control over my wellbeing while being fully cared for by my family and home-care provider."

Customized and flexible

"The beauty of this system is that it allows me to decide exactly which of my father's daily activities I want to track and receive alerts. If he has woken late or missed a meal I will know about it. This is important to me"

Adding value for service providers

"The Care@Home Family product has allowed us to increase our value to our customers. This is a self-installed solution that allows family members to keep an eye on their loved ones while offering the peace of mind of professional response."

Care@Home™ Family

Features:

- Real time activity reports of covered areas of monitoring
- Activity index summarizing daily activity
- Automatic alerts to indicate hazard and worsening health scenarios
- Rich administrator's interface for professional monitoring
- Simple do-it-yourself installation
